

Spring Plate Bushing Cutter Kit - Part #2061002

Cars applicable:
65-86 911/912/930

Parts list:

Qty	Description
1	Bushing cutter
1	"T" handle

Required but not included:

Razor knife
Propane torch
Shop press or sturdy pipe clamp
Bench Vice
Water
Abrasive cloth strips, available from Elephant Racing (works best) – or 80 grit sandpaper

Introduction –

This Elephant Racing Rubber Spring Plate Bushing Kit makes easy work of spring plate bushing removal. The bushings are bonded to the spring plate, and removal has traditionally been difficult. This convenient cutting tool shaves the bushings off, removing nearly all the rubber and require just a bit of cleanup to finish. This tool greatly simplifies the bushing removal process

Kit contents

Instructions –

- 1- Heat the spring plate metal where it contacts the bushing with a propane torch – get it good and hot
- 2- Use shop press or pipe clamp to press the cutter through the bushing - once the cutter bottoms out on metal, stop pressing or the cutting edge will be damaged
- 3- Use a razor knife to cut the rubber away from the flat part of the spring plate
- 4- Insert cutter handle and twist the bushing off
- 5- Use abrasive cloth strips or sandpaper to remove remaining rubber bits
